

To whom it may concern.

Dr. Harris and his staff at California Hernia Specialists provided inguinal hernia surgery repair services for me just over 3 weeks ago. Every aspect of their service was impeccable. On very short notice they were able to schedule my consultation and surgery, and even arranged a highly discounted rate for my stay at a four star hotel right around the corner, adding yet another level of comfort and convenience to the experience.

When I met with Dr. Harris, I found him to be extremely knowledgeable, taking the time to clearly explain everything I needed to know, and leaving me feeling assured of a successful outcome. I knew I had found the best possible surgeon for my hernia repair.

Dr. Harris, his anesthesiologist, and assistants provided an amazingly quick and comfortable experience for the surgery. I was released and walked out just 4 hours from the time I walked in. My injury, actually 3 separate significant injuries, were all corrected in this one procedure and at the same flat rate originally quoted.

Living in SW Oregon, my health care options are limited to a system that could neither provide a true specialist, nor a quote of less than \$18,000+. Additionally, I am self-pay (no insurance) and cannot afford to waste money. Dr. Harris charged under \$4,000 for everything, his fee, the surgical center, anesthesiologist and assistants, less than the deductible on most health insurance policies, and still provided the finest quality care. I truly believe it is Dr. Harris' business model that is the answer to the future health care of this country, not mandated insurance supporting a system that is out of control in both cost and quality.

It feels wonderful to know my injuries were repaired and to enjoy normal activity and a healthy lifestyle once again.

Dr. Harris, thank you to you and your staff for the amazing service and skill you provided me when I needed it the most.

Best always,

Dana O.
